ARTE CERAMICA

# The vision of a responsible brand

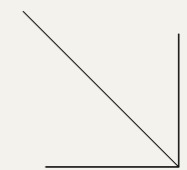

At Metro Arte Ceramica, our vision is to bridge creativity and architecture, transforming surfaces into meaningful expressions of design intent. We believe every tile holds the power to define atmosphere, articulate rhythm, and evoke emotion through materiality and form.

Our collections are born from the interplay of texture, proportion, and tone where natural inspiration meets refined craftsmanship. Each piece is conceived to complement architectural vision, enabling designers to shape spaces that resonate with warmth, balance, and depth.

We aspire to collaborate with architects and creators who view surfaces not as finishes, but as integral components of spatial storytelling. Through innovation, precision, and sustainability, we seek to cultivate harmony between imagination and structure.

# Breathe Your Aesthetic

The art of bringing  
harmony in textures.

Through innovation in texture, relief, and proportion, we aim to redefine the aesthetic and tactile experience of modern surfaces. Each collection reflects an architectural sensitivity balancing material honesty, structural rhythm, and visual depth.

Our vision is to create a dialogue between architecture, material, and emotion where surfaces transcend functionality to become expressions of spatial character. We see every tile as a crafted element of design, shaped by precision and imagination, seamlessly bridging the worlds of nature and contemporary form.

# Infinite Elegance

Aim to be your  
creative partner.

Our collections are crafted for those who seek balance between natural inspiration and contemporary design. Each tile embodies refined detail and enduring quality, transforming walls and floors into canvases of expression.

Whether you're curating a private home, a hospitality space, or a commercial project, our designs bring cohesion and character to every environment.

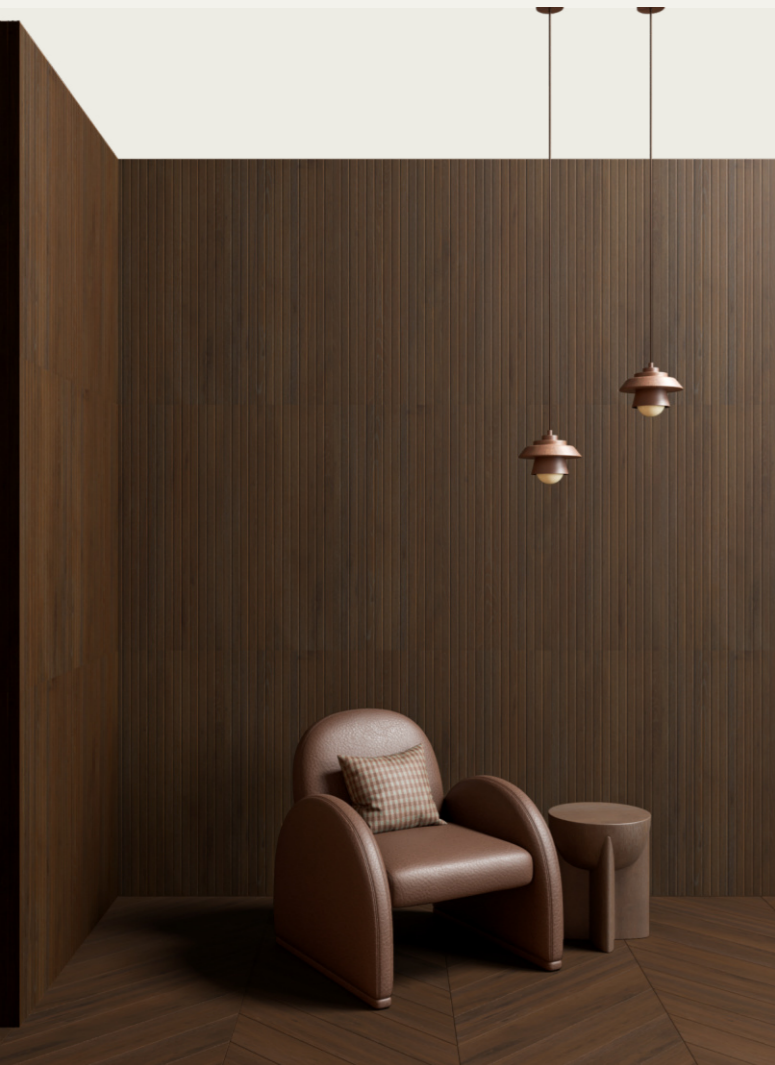

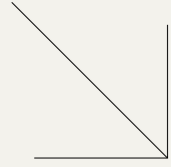

## Grain & Groove collection

The Grain & Groove collection is an architectural interpretation of wood a dialogue between texture, rhythm, and design precision. Crafted in a contemporary **40x90 cm** format, this collection redefines the essence of wooden relief tiles, offering surfaces that balance tactile warmth with structural depth. Each piece captures the organic movement of natural grain, accentuated by subtle reliefs that play with light and shadow, adding dimension and soul to modern spaces.

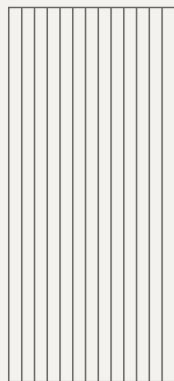

Designed to cater to architects and designers who seek authenticity in material expression, Grain & Groove celebrates the harmony between craft and geometry. The collection's complementary **15x90 cm chevron** format introduces a dynamic layer of visual rhythm ideal for creating directional flow across floors and walls. Together, they form a curated language of design that merges traditional wood inspiration with contemporary architectural sensibility.

# Smooth Pale Wash

PLAIN PUNCH

The **Plain** relief, characterized by a Smooth Pale Wash, represents the essence of modern simplicity. This surface offers a beautifully continuous, tactile texture with subtle wood graining and zero dimensional relief. It is designed to provide a quiet, sophisticated backdrop that maximizes light and space. Ideal for both wall and floor applications, this smooth finish ensures easy maintenance while delivering the elegant, uncluttered aesthetic demanded by contemporary design.

# PLAIN

The **Plain** Collection offers **13 colors**, from soft whites to deep earthy browns, empowering limitless design expression. It brings harmony to interiors through seamless zoning and smooth transitions. Perfectly balancing warmth and neutrality, it pairs effortlessly with textures, metals, and fabrics to create refined, timeless spaces.

CHEVRON

Our expanded palette of twelve colors provides maximum freedom for designers to create diverse architectural environments. The range spans crisp, bleached whites to warm, honeyed golds and deep, oxidized browns. This extensive selection allows for precise control over the visual temperature of a room, easily adapting to any design brief—from the cool serenity of a Nordic spa to the rich, grounded warmth of a classic urban retreat.

The key architectural usefulness of these colors lies in their capacity for seamless zoning and transition. Multiple colors can be used together to subtly define functional areas in open-plan layouts, or a single color can flow across different environments to maintain visual unity. By offering this broad spectrum, the **Plain collection** acts as the foundational element, ensuring perfect coordination with complex textures, metals, and fabrics throughout a project.

# Ottone

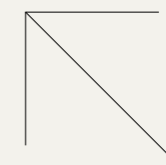

The **Plain** design is available in two essential formats: a substantial **40x90 cm** rectangle and a dynamic **15x90 cm chevron** shape, all featuring the signature smooth finish across twelve colors. The large rectangular format provides a contemporary, expansive backdrop perfect for main wall applications, minimizing grout lines and amplifying the clean aesthetic. This standard size establishes a foundational visual calm that is easily integrated into diverse room dimensions, ensuring design coherence and sophisticated scale.

The accompanying **chevron size** introduces a powerful geometric element, ideal for creating feature zones or floor-to-wall transitions. By utilizing the same twelve colors and the **Smooth Pale Wash** surface across both the **40x90 cm** and **15x90 cm** tiles, designers can achieve effortless harmony between areas. This flexibility allows for a sophisticated interplay of size and pattern using the chevron for high-impact visual texture and the rectangle for restful simplicity all while maintaining perfect color match and aesthetic continuity.

# Parallel Striped Wood Array

IPE PUNCH

**IPE punch** elevates surfaces with refined texture. It offers a sophisticated, contemporary twist on **classic wood panelling**, utilizing fine, parallel vertical strips to create a rhythmic, structured appearance. The muted, cool-toned finish provides an elegant, shadow-play effect, ideal for enhancing modern residential or commercial walls with subtle dimensional depth.

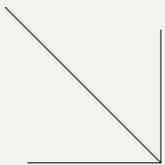

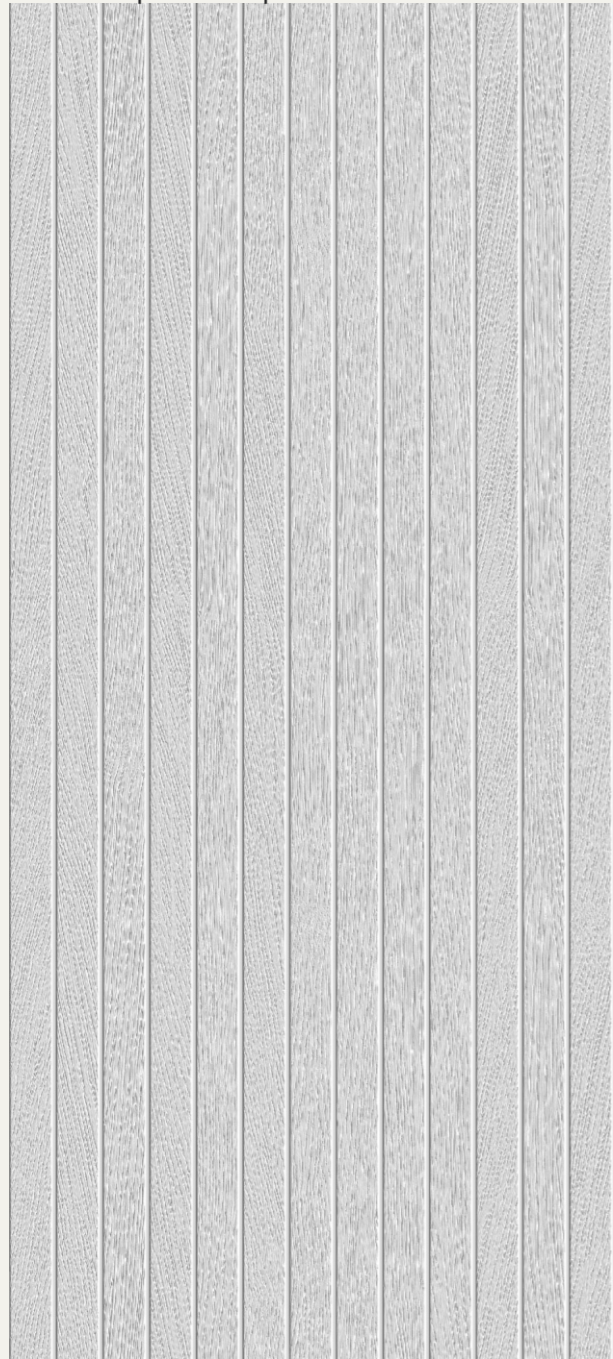

Frassino picied

# Frassino Picied

40x90cm | 8 Colors | 1 Punch

Frassino, **40x90 cm**, Available with IPE punch, masterfully combines the warmth of wood with the sophistication of structured design. Its signature Linear Wood Grid relief features fine, parallel stripes that impart a dynamic, rhythmic elegance to any space.

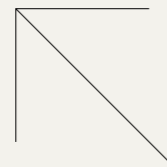

Unlike flat wood-look tiles, this design uses advanced digital and tactile technology to embed a realistic, nuanced wood texture directly onto each narrow stripe. This creates an exceptional play of light and shadow, highlighting the subtle graining and knots within the grooves. The result is a stunning dimensional effect that brings walls to life, moving beyond simple cladding to become a focal point.

# Direction Pattern Flow

LISTON PUNCH

The **Liston** relief is a stunning exercise in Directional Pattern Flow, merging bold geometry with organic wood aesthetics. It features dynamic, upward-pointing V-shapes where sections of smooth wood texture intersect with finely hatched, lined segments. This graphic interplay creates a striking, energetic sense of movement across the **40x90 cm** surface. The resulting dimensional texture elevates any wall into an immediate architectural focal point.

LISTON

The utility of these colors lies in their ability to define and transition architectural environments. A seamless, monochromatic scheme can be achieved using a single color for expansive walls, while contrasting colors can be used to delineate functional zones, such as backsplashes or fireplace surrounds. This extensive palette ensures the **Liston** relief can harmoniously integrate with or boldly differentiate itself from surrounding design elements, maximizing creative freedom.

LISTON CEDAR

LISTON BEIGE

LISTON ANGRIS

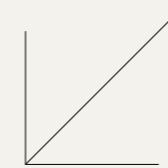

LISTON WHITE

LISTON TEAK

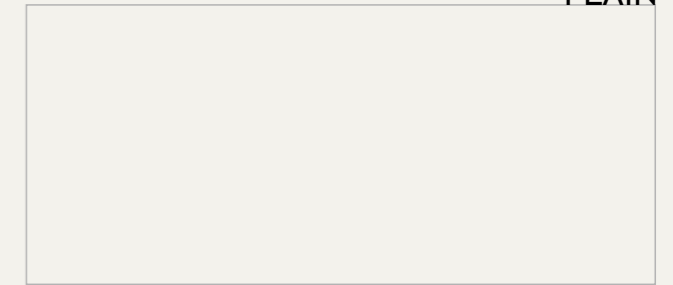

LISTON NATURAL

We offer six distinct decorative varieties that ensure the **Liston** relief seamlessly harmonizes with dominant material trends. These variations include subtle shifts in the hatching density and the proportion of the smooth wood area, allowing for tailored coordination. Our decorators are specifically designed to complement the natural tones and graining found in actual wood floors and paneling, enhancing the biophilic connection in a space.

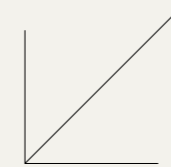

Further expanding the tile's application, other varieties are color-matched to popular cement and marble finishes. Use the Liston relief with grey-toned variations against large-format cement floors for an industrial-chic look, or pair a cream-colored variant with light marble for a luxurious, transitional design. This cross-material compatibility makes the **Liston** collection a versatile solution for layered interior design.

# Liston Walnut

40x90cm | 7 Colors | 1 Punch

The dynamic **Liston** relief is available in both a tactile **punch surface** and a smooth **plain surface**, across all seven color options, significantly increasing its harmonizing potential. The punch surface features a distinct, dimensional texture that emphasizes the relief, making it ideal for feature walls where the interplay of light is crucial. This pronounced texture ensures the tile feels as premium as it looks, maximizing the impact of the **Directional Pattern Flow** for a captivating focal point in any environment.

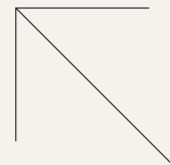

The accompanying plain surface maintains the high-definition wood aesthetic and color consistency but lacks the deep relief, allowing for use in areas requiring easier cleaning or simpler visual transition. By utilizing the same seven color options across both the punch and plain surfaces, designers can create a beautifully consistent color flow from a textured feature wall (punch) to adjacent smooth areas (plain), achieving helpful harmony and balance between different environments without sacrificing the overarching aesthetic integrity of the **Liston Collection**.

# Uniform Module Play

RELEVO PUNCH

The **Relevo** relief defines dimensional texture, using Uniform Module Play to create a dense field of fine, parallel lines. This deep relief transforms the **40x90 cm** tile into a compelling architectural surface, utilizing every line to cast distinct shadows. This constant interplay of light ensures the wall remains dynamic and visually engaging, delivering a contemporary and sophisticated form of wall cladding that emphasizes tactility and depth.

The utility of these **13 colors** is rooted in their ability to define and transition spaces. They support the creation of powerful accent walls that seamlessly integrate with surrounding materials. Achieving biophilic connections is effortless with our range of wood-inspired tones, while the cooler, solid colors provide a sleek contemporary backdrop. This broad color range guarantees the **Relevo** collection can accurately articulate any design intent without compromise.

# Relevo Venglia

40x90cm | 13 Colors | 1 Punch

The **Relevo** design is offered in both a dramatic, tactile **punch surface** and an equally sophisticated **plain surface**, spanning all twelve color options for maximized design flexibility. The punch surface is reserved for the relief itself, where its defined texture emphasizes the Uniform Module Play and the depth of the pattern. This surface is perfect for feature walls where the juxtaposition of light and shadow is intended to be a primary visual statement in the environment.

The accompanying plain surface maintains the exact same color and finish, but without the deep relief. This is ideal for adjacent walls or areas requiring a smooth finish for practicality, while still providing color continuity. By matching the twelve colors across both the punch (relief) and plain (flat) surfaces, designers achieve a high degree of harmony. This combination allows for sophisticated zoning, blending the enveloping texture of the punch surface with the simplicity of the plain, ensuring aesthetic integrity throughout.
